

Research Activity Report
Supported by “Leading Graduate Program in Primatology and Wildlife Science”
 (Please be sure to submit this report after the trip that supported by PWS.)

	2016. 06, 11
Affiliation/Position	Primate Research Institute/M1
Name	Yuri Kawaguchi

1. Country/location of visit
Kyoto, Kyoto University
2. Research project
Psychological symposium
3. Date (departing from/returning to Japan)
2016.06.11
4. Main host researcher and affiliation
Unit for Advanced Studies of the Human Mind
5. Progress and results of your research/activity (You can attach extra pages if needed)
Please insert one or more pictures (to be publicly released). Below each picture, please provide a brief description.
<p>I attended the psychological symposium and made a poster presentation in the main campus. Before symposium, they hold a talk session which done by Mr. Dai Tamesue, an ex-athlete and Dr. Shinsuke Shimojo, a cognitive neuro scientist. It was much more wonderful than I expected. Mr. Tamesue talked about many things for which, he has gotten the idea through his actual experiences as a medalist. The topics covered varied things; the relationship between audience and performance, body image, inhibition about paying attention to something, and so on. These kinds of discussions are very compatible with psychological discussion. I was so impressed.</p> <p>The title of my presentation was ”Do capuchin monkey have the ability to discriminate age category for faces of other species?” Usually I do not have much opportunity to talk with researchers in Kyoto, so it was good to talk with them. However, it would be better if I had visited more posters because I could not hear about many presentations. I also visited the lab which I used to belong. I discussed about my experiment, which is still conducted.</p> <p>Together, this trip was very fruitful.</p>
6. Others
I'd like to thank PWS for giving me this opportunity.
