

Research Activity Report
Supported by “Leading Graduate Program in Primatology and Wildlife Science”
 (Please be sure to submit this report after the trip that supported by PWS.)

2017. 8. 25	
Affiliation/Position	Wildlife Research Center/M1
Name	Yutaro Sato

1. Country/location of visit
Japan/Yamaguchi prefecture, Tokiwa Zoo
2. Research project
The 4 th forum for the earth environment with Ube City Sarurinpic ~challenge animal’s abilities
3. Date (departing from/returning to Japan)
2017. 8. 19 – 2017. 8. 20 (2 days)
4. Main host researcher and affiliation
Ms. Rie Akami, Chief Curator at Japan Monkey Centre. Mr. Masato Obuchi, Assistant Professor at Wildlife Research Center, Kyoto University; Curator at Japan Monkey Center
5. Progress and results of your research/activity (You can attach extra pages if needed)
Please insert one or more pictures (to be publicly released). Below each picture, please provide a brief description.
<div style="display: flex; justify-content: space-between;"> <div style="width: 60%;"> <p>The aim of this trip was to join the forum held at Tokiwa Zoo, Ube City, Yamaguchi prefecture and learn about the efforts for natural environment made by Ube City and the zoo.</p> <p>Since I’m interested in what cities or zoos are doing with general citizens for education and public relations, I joined this forum. In the previous day of the forum, I could see the zoo. Although the zoo was not so big as other ones, its way to display animals was so elaborated, which enabled me to feel animals close. In particular, exhibition similar to animal’s natural habitat was really impressive. Moreover, when I saw some things such as benches or trees donated by citizens or companies to the park, I found that people there value the park.</p> <p>The forum consisted of a workshop, a lecture, and a zoo tour. In the workshop, participants could enjoy vertical jump, a monkey bar, a cognitive experiment of short-term memory, and measuring the volume of their voice, challenging animal’s ability (Fig.2). I was in charge of the monkey bar, but I had my hands full preventing the participants from getting injured.</p> <p>In the lecture in the latter half of the forum, Mr. Obuchi gave me some minutes to talk about my research. I often talk about my research with students or researchers at universities, but this was the first time for me to talk to general citizens. Therefore, I was slightly nervous. I want to make a good use of this experience in the future presentation at conferences or symposiums.</p> </div> <div style="width: 35%; text-align: center;">  </div> </div>

(Please be sure to submit this report after the trip that supported by PWS.)

This forum provided me with a chance not only to do presentation to general citizens but also to see the effort made by the zoo and the city with my own eyes. Even though the trip was very short, it was so valuable.

Figure 2. The monkey bar displayed in the workshop. The aim was to let participants to challenge the brachiation skill of gibbons.

6. Others

I appreciate Ms. Akami, Mr. Obichi, Ms. Tanaka at Japan Monkey Centre, and Ms. Asami at Primate Research Institute for their kind cooperation. I also thank to the staffs at Tokiwa Zoo and Ube City for their kind support.
