

CICASP Seminar in Science Communication: Summary & Outline

Thursday 9th July, 2015

Summary: CICASP Seminar 08 Practice Presentations with Feedback: Session 1

At this seminar, we listened to presentations by Morgane, Lucie and Emi. There was a short question and answer period after each presentation, followed by feedback from the audience and from the CICASP Team. Presenters received opinions and advice, both about their presenting style and the design and content of their powerpoint slides. There were a lot of very complimentary and encouraging comments for each presenter. Responses to the presentations included some specific pointers as to how improvements might be made.

Wednesday 15th July, 2015

Outline: CICASP Seminar 09 Practice Presentations with Feedback: Session 2

This CICASP Seminar is the second of three giving students the opportunity to practice their presentations and to benefit from constructive feedback. This time, Duncan and Rachel will present their talks, and Camille will present her poster (see below). All three presentations will be given shortly at the 31st Primate Society of Japan Annual Meeting in Kyoto.
