

SUMMARY

CICASP Seminar in Science Communication #126

JSPS DC Fellowship Application Guide

4PM–, Wednesday, April 22, 2020 (online meeting using Zoom)

In this first seminar of the academic year, we first discussed how you should approach grant writing in general. We then gave an overview of the application process for the **JSPS Research Fellowships for Young Scientists (RFYS)**, with the focus on the doctoral (DC1/DC2) level fellowships*.

Materials from this seminar (including presentation slides) are available in a shared Google Drive folder (see email announcement for a link).

*Note to applicants for JSPS postdoctoral fellowships: The “PD” category of RFYS requires Japanese citizenship or permanent resident status. If you are neither, you will likely be applying for the [JSPS Postdoctoral Fellowships for Research in Japan](#), which is a different fellowship program with earlier deadlines (make sure to check with your prospective host).

OUTLINE

CICASP Seminar in Science Communication #127

JSPS DC Fellowship Application Guide #2

4PM–, Thursday, April 30, 2020 (**online meeting using Zoom; access details will be provided in email announcements**)

Following last week’s introduction to the **JSPS Research Fellowships for Young Scientists**, we will look at past examples of research statements and rough drafts shared by this year’s applicants (= you!). We will discuss what makes a good research proposal and provide feedback on your drafts.

This workshop is primarily intended for applicants for the doctoral-level (DC1/DC2) fellowships, but everyone is welcome to join, whether you are thinking about applying next year, or have applied in the past and want to share tips with your colleagues.
