

Research Activity Report
Supported by “Leading Graduate Program in Primatology and Wildlife Science”
 (Please be sure to submit this report after the trip that supported by PWS.)

2014. 8.15

Affiliation/Position	Wildlife Research Center/M1
Name	Ryo Kutsuma

1. Country/location of visit
Kumamoto prefecture, Kumamoto sanctuary (KS)
2. Research project
Comparative Cognitive Science Course
3. Date (departing from/returning to Japan)
2014. 6.17 – 2014. 6.20 (4days)
4. Main host researcher and affiliation
Kyoto University Wildlife Research Center Kumamoto sanctuary (KS)
5. Progress and results of your research/activity (You can attach extra pages if needed)
Please insert one or more pictures (to be publicly released). Below each picture, please provide a brief description.
<p>This course was practiced for the purpose of learning fundamentals of Comparative Cognitive Science or animal welfare. The details of the course were 1) touch-panel experiment and eye tracker experiment, 2) individual identify of chimpanzees, 3) observation on behavior of bonobos and chimpanzees, 4) preparation of touch-panel experiment device and 5) practice of environmental enrichment.</p> <p>The best striking thing I thought in this course is the relationship between the staff in KS and animals in KS. It seemed to be very trustful. Humans have a duty of making captive animals happy. I think the most important thing is trying the best to understand animal’s feelings.</p>
