5. Progress and results of your research/activity (You can attach extra pages if needed)	<p>Please insert one or more pictures (to be publicly released). Below each picture, please provide a brief description.</p> <p>Every year, PWS students run a booth in Marunouchi Kids Jamboree with largely support of PWS staffs. This year, unusually, students planed how to run a booth as an outreach event from the beginning with a small support from April. I joined meetings from June, and made a part of exhibition.</p> <p>As a training, we tried to talk with the guests and have science communication. I suspected that the guest did not want to talk, but actually, many children thought deeply and answered to my questions.</p> <p>I may have many chances to talk with general people and I want to make them good using this experience.</p>
