

Research Activity Report
Supported by “Leading Graduate Program in Primatology and Wildlife Science”
 (Please be sure to submit this report after the trip that supported by PWS.)

2017. 09. 06	
Affiliation/Position	Wildlife Research Center/M2
Name	Sota Inoue

1. Country/location of visit
University of Tokyo, Japan
2. Research project
KOUDOU 2017
3. Date (departing from/returning to Japan)
2017.8.30-2017.9.1
4. Main host researcher and affiliation
5. Progress and results of your research/activity (You can attach extra pages if needed)
Please insert one or more pictures (to be publicly released). Below each picture, please provide a brief description.
<p>I report “KOUDOU 2017” that I joined and was held on university of Tokyo from 30th August to 1st September. This conference was joint conference, thus, not only animal ethological conference, but also animal psychology, applied animal behavior, livestock, and behavioral neuroendocrinology. My presentation last year did not give us interesting discussion because of insufficient analyze. I almost finished analyzing and got interesting discussion this year. Many people came my poster and gave me many comments about my result. Some comments and opinions were completely opposite Therefore, I thought my result need more deeply analysis and get consideration that can convince people. I should join meetings and give a presentation to get more comments because studying and thinking in my laboratory narrow the way to thinking of me.</p> <p>Other people’s presentations were very various and interesting. Presentations among many fields make me think my interest again. I gradually have used to conferences. Therefore, I could have good conversation with other participants. Discussion with the same generation motivated me to study and give me competitive consciousness. I will join next year conference too.</p>

Poster presentation
6. Others
I am very grateful to the support from PWS.
