

Research Activity Report
Supported by “Leading Graduate Program in Primatology and Wildlife Science”
 (Please be sure to submit this report after the trip that supported by PWS.)

2019. 2, 9

Affiliation/Position	Primate Research Institute/L4
Name	Gao Jie

1. Country/location of visit
Japan Monkey Centre, Inuyama, Aichi, Japan
2. Research project
The 63 rd Primates Conference
3. Date (departing from/returning to Japan)
2019.1.26 – 2019. 1. 27 (2 days)
4. Main host researcher and affiliation
Japan Monkey Centre
5. Progress and results of your research/activity (You can attach extra pages if needed)
Please insert one or more pictures (to be publicly released). Below each picture, please provide a brief description.
<p>I participated in the 63rd Primates Conference. During the two-day conference, I enjoyed many talks about primate studies from various fields.</p> <p>I had a poster presentation at the conference. It was about my research on the body structure understanding in chimpanzees. I received many comments. Because most researchers in this conference study primates, I received many comments about body perception across species, for example, “how do chimpanzees perceive humans and other species”. My experiments covered part of this question, and there is unexplored part to be further studied.</p> <p>This is one of the most important features of this conference-all are about primates, but from different fields and perspectives, using different kinds of methods. This was a valuable opportunity to learn about primates through various kinds of primate studies. I enjoyed the topics by other researchers, as well as the discussions with other researchers during the conference.</p>

(Chimpanzee family at JMC)
